About Think Water Darwin

Think Water Darwin is part of an industry leading franchise group with 49+ locally owned stores across Australia and New Zealand. Each individual franchise is supported with national supply arrangements, marketing support and training. Think Water stores offer a wide range of irrigation and water management products and provides design, installation and maintenance services for the Agriculture, Commercial, Industrial and the Residential markets.

In 2006, Delta Electrics NT Pty Ltd created a standalone water business, Delta Water NT Pty Ltd. Delta Water NT Pty Ltd purchased a local Darwin business trading as Turf and Irrigation Darwin and on 8 May 2007 the business began trading as Think Water Winnellie. Delta Electrics Pty Ltd sold its water division, inclusive of all sales, parts and service activities to Think Water Winnellie. Delta Water NT Pty Ltd exchanged contracts with H2O Pty Ltd in May 2011 to purchase retail stock and goodwill from the business and building works commenced for the second Think Water store at Virginia with its opening in September 2011.

Think Water Winnellie and Think Water Virginia now have almost 20 staff combined, including an in-house Certified Irrigation Designer.

Our Capabilities & Key Markets

OUR CAPABILITIES

Think Water Darwin specialises in supplying water efficient pumping, irrigation, pressure cleaners and water purification and filtration systems. Think Water Winnellie and Virginia have successfully provided services to all facets of the industry throughout the Northern Territory.

Think Water Darwin specialises in the supply, installation and service of water pumping products, irrigation products, commercial and industrial pressure cleaners and water purification products. With an in-house Certified Irrigation Designer, Think Water Darwin also specialises in project management of irrigation projects.

Our role is to enable clients to meet their objectives and successfully complete their projects. This means we take the time to clearly understand your project objectives and assess whether the project brief will deliver those objectives. We propose alternative solutions where required and design strategies to achieve client objectives, taking into account feasibility, risk, approvals and longevity.

KEY MARKETS

The key markets we are capable of servicing include:

1. AGRICULTURAL

We have been servicing the agriculture market with pump systems, monitoring and reporting systems and bore water systems.

2. DOMESTIC

Providing a range of products and services for households including pumping, filtration, tanks, pool supplies and much more.

3. LANDSCAPE

We provide a full range of irrigation and water management systems for landscape projects including parks, ovals and golf courses.

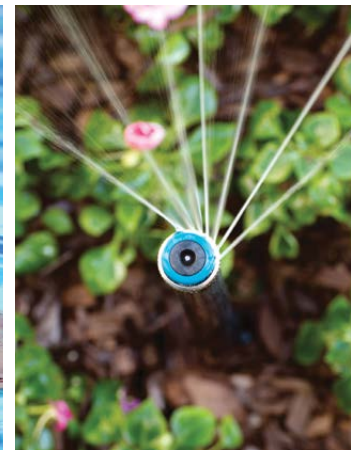

4. COMMERCIAL

Design, supply and maintain water pump systems for small to large commercial buildings.

5. MINING/INDUSTRIAL

We provide a range of water management systems for industrial applications including wastewater, pumping systems, pipes and more.

All of our team members undertake extensive training in irrigation and water management as well as training from leading industry suppliers ensuring our clients receive the best advice on their project.

Our Stores

KEY STAFF

Adam Stockwell is the founder and Managing Director of Think Water Darwin. He has over 20 years experience in designing, installing and managing irrigation projects for a wide array of customers.

Kelly Stockwell manages the finance and business admin for both of the stores. She has the experience and expertise to keep the business under control, with her outstanding skills in managing the finances and back office support.

Colin McTaggart has over 25 years experience in the irrigation industry and has helped many industrial projects with their pump system design and installation. He was previously the Branch Manager for Think Water Winnellie, however, he is now the Business Development Manager dealing with government tenders, power, and water and aboriginal corporations.

Craig Moffatt is the Key Account Manager for mining, dealing with large scale projects, special fabrication and mine requirements.

RATES

In-house labour rate: \$110 + GST per hour during normal business hours. Minimum charge of one hour applies.
On-site labour rate: \$110 + GST per hour during normal business hours. Minimum charge of one hour applies.

OPENING HOURS

Think Water Winnellie and Virginia showrooms are open Monday through Friday 8:00 am - 5:00 pm, and Saturdays 9:00 am - 2:00 pm.

OUR KEY SUPPLIERS

Completed Projects

Palmerston Park

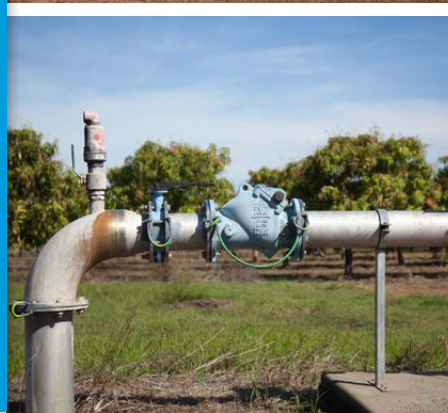

CLIENT: Palmerston City Council
LOCATION: Palmerston, Darwin
BROAD SCOPE: At this park in the Palmerston area in Darwin, Think Water Darwin designed, supplied and installed a brand new irrigation system which means that the grass will stay this green all year 'round.

SCAN TO VIEW

Acacia Hills Farm

CLIENT: Acacia Hills Farm
LOCATION: Acacia Hills, Darwin
BROAD SCOPE: Calypso mangoes have a prominent name in the Australian fruit market and are produced at the Acacia Hills Farm. At Think Water Darwin, we designed, supplied and installed an INTELLiPUMP system that keeps the mango trees healthy and fresh. INTELLiPUMP applies the correct amount of water at the correct time which reduces crop stress and susceptibility to disease and pests, plus increases the crop's long-term sustainability and profitability. The farmers can now enjoy irrigation scheduling and control software - installed on a PC, it monitors, sends control commands and automates irrigation schedules. [QR CODE LINK TO VIDEO]

Marrarra Christian College

CLIENT: Marrarra Christian College

LOCATION: Marrara, Darwin

BROAD SCOPE: At the Marrarra Christian College, the irrigation system they were using for their ovals was outdated which meant that there was dry grass and donut rings all over the ovals. Think Water Darwin designed and installed a new oval irrigation system and pump station, which included a 220,000L storage tank. The college can now enjoy an automated system that can be controlled from anywhere and leaves their ovals looking lush and green.

Rural Block Bore Water & Filtration System

CLIENT:

LOCATION:

BROAD SCOPE: Think Water Darwin were engaged to install a home package which consisted of a few different elements that made this rural home's water great to drink. They installed a bore pump which pumped water into the water tank, a variable speed booster pump, to pump water out of the tank to the home (with constant pressure). They then installed a filtration system and water softener to reduce harmful bacteria from the water, ensuring it's clean, great-tasting water.

OTHER PROJECTS

DEPARTMENT OF INFRASTRUCTURE

Provided three Seawater diesel powered fire pump systems, valued at more than \$1 million. We also supplied and installed a telemetry controlled irrigation system, valued at more than \$100,000.

GOVE DISTRICT HOSPITAL

Audit and upgrade telemetry irrigation system, valued at more than \$25,000.

DARWIN CITY COUNCIL

Design, supply and install irrigation system Shoal Bay waste disposal site, valued at more than \$25 000.

ICHTHYS PROJECT AND WAGNER'S CONCRETE

Design and supply dual acid/coagulant dosing system complete with triplex disc filtration package, valued at more than \$130,000.

REDLINE PLUMBING

Design, supply and commission Dual 75kw variable speed pump system, valued at more than \$80,000.

DARWIN ABATTOIR PROJECT AND SELTER SHAW PLUMBING

Supply potable, fire, chlorination and waste water pump systems, valued at more than \$250,000.

Elcho Oval

SCAN TO VIEW

CLIENT: City Council

LOCATION: Elcho Island

BROAD SCOPE: Design, supply and installation of an oval irrigation system in Elcho. The new irrigation system will see the oval turning green in no time.

TESTIMONIALS

“Girraween Nursery engaged Think Water to sort out the problem of white and brown staining on new plants. The Nursery was spending a large sum of money on continuously repotting the plants for commercial customers to ensure plants were at their best when sold to retail markets. The Think Water team was contacted after limited success from other service providers. The project's early stages were trial and error before the issue was resolved. Think Water implemented new maintenance processes and the client got the results they were looking for.” - [Girraween Nursery](#)

“Gove District Hospital approached Think Water to resolve issues with its telemetry irrigation system. They contracted our team to audit the system, which concluded the system's faulty installation meant it would never operate correctly. Think Water proposed a plan and firm quote to repair the system and ensure it was operational.” - [Gove District Hospital](#)

Our Commitment

WORKPLACE HEALTH & SAFETY

Think Water Darwin believes the safety, health and welfare of employees is of paramount importance.

Management takes all reasonable and practical action to provide a safe work environment to minimise health risks of all employees, and operate within all statutory requirements and Australian Standards.

Our management team demonstrate commitment to a safe workplace by providing a safe environment, training on work safety and an open space for staff to discuss the topic. Think Water achieve's this through safe plant and work systems including actions for the use and handling, storage and transport of plant and materials, and monitoring effectiveness of safety procedures.

Individual employees are also responsible for ensuring their health and safety at work by complying with safety procedures, reporting potential or actual hazards, and not interfering with or misusing items or facilities.

Think Water staff share the objective to actively cooperate and promote awareness of occupational health and safety, and reduce our environmental impact.

SUSTAINABLE DEVELOPMENT

We actively seek ways to reduce our environmental impact and waste footprint. We have introduced processes to lower waste, water and paper usage, and where applicable our team recommend products known for water conservation.

QUALITY ASSURANCE

Think Water Darwin aims to provide quality services and products to ensure customer satisfaction, contractual obligation and follow regulatory requirements.

It is the Think Water Darwin's policy to develop and maintain a quality system throughout our operations and in accordance with the International Organisation for Standardisation.

Think Water Darwin has made a commitment to the continuous improvement of all activities to remain an industry leader.

All employees are responsible for the quality system and the Directors who are committed to the policy endorse this. The Directors hereby confirm the company's commitment to maintaining high performance for client requirements.

Thinking of Your Next Project?

The Think Water Darwin team has the experience and expertise to supply, install and service any irrigation, pumping and water management project for agriculture, commercial, industrial and residential application. No project is too big or too small. Come see us at any of our stores and we'll tailor a solution to your needs.
